OPENING KEYNOTE

Steffen Damborg, Author & expert in digitalisation, artificial intelligence & leadership

09.55 - 10.25

LEGAL TECH BEYOND THE HYPE: WHY THE REAL WORK STARTS BEFORE YOU BUY

Legal teams are often drawn to polished tools and bold promises – but success is determined much earlier.

This session explores why outcomes depend less on the tool and more on the groundwork: strategy, processes, and change management – illustrated through Arla's transformation journey.

Head of Legal Operations and Innovation **Kasper Riis Hansen**, Arla Foods

10.25 - 10.40: **BREAK**

10.40 - 11.10

IMPLEMENTATION OF AI IN A LEGAL DEPARTMENT

This session provides a practical perspective on how the legal department in Nykredit has approached the implementation of AI.

The presenters will share how they moved from initial exploration to the use of AI in concrete use cases, including the selection and testing of AI tools, governance considerations, and their approach to driving adoption across the legal department.

Chief Specialist, Tech Legal **Thomas Auning-Hansen**, Nykredit

Director, Tech Legal **Heidi Eva Kusz Kejser**, Nykredit

11.10 - 11.25

FROM DRAFTER TO DIRECTOR

As AI evolves from standalone chat tools into agents capable of completing entire workflows, Vesence believes the role of the lawyer is changing. Benjamin Johansson from Vesence explains how Vesence enables lawyers to move beyond traditional ways of working and become directors of their own army of AI agents, reviewing the agents' output and stepping in where legal judgement is required.

Founding GTM **Benjamin Johansson**, Vesence

11.25 - 11.40

AGENTIC AI FOR LEGAL WORK: WHY WHAT THE AI REASONS FROM MATTERS MORE THAN THE AI ITSELF

Director, Legal Solutions **Jason Heyman**, Thomson Reuters

11.40 - 12.00: COFFEE BREAK, NETWORKING & PARTNER EXHIBITION

Take the opportunity to meet fellow participants and visit our partners in the exhibition area, where you can explore solutions, insights and new perspectives connected to today's programme.

12.00 - 12.25

Partner Sessions:

LEGAL TECH IN PRACTICE

Choose between short, focused sessions with selected partners sharing practical perspectives, use cases and solutions relevant to today's legal tech agenda.

TRACK 1

12.00

AI AND DEVELOPMENTS IN LEGAL INTERPRETATION & ANALYSIS

How legal analysis is shifting from curated knowledge towards dynamic interpretation powered by AI.

For decades, legal analysis has been shaped by editorial models, where experts packaged relevant information and provided, interpretations and distilled legal developments into authoritative sources.

AI is changing this paradigm. Legal professionals increasingly interact directly with primary legal sources, while AI assists in identifying patterns, compare authorities, tests alternative interpretations, and exposes conflicting arguments rather than presenting a single editorial conclusion.

Co-Founder & CEO **Casper Laursen**, Pandektes

12.13

FROM CONVERSATION TO COURT-READY DOCUMENT: HOW AI GIVES LEGAL PROFESSIONALS THEIR TIME BACK

Every legal professional knows the challenge: documentation takes valuable time away from clients and billable work. In this session, discover how AI can transform natural conversations into structured legal documents in minutes. Learn how SpeechLive Legal combines optimized legal speech recognition, intelligent document generation, and secure workflows to reduce administrative effort, improve consistency, and help legal teams focus on what they do best—delivering expert legal advice.

Key Account Manager DACH & INT **Elena Ciacchi**, Speech Processing Solutions GmbH

TRACK 2

12.00

DIGITAL SOVEREIGNTY: WHERE IS YOUR LEGAL DATA ACTUALLY LOCATED?

For lawyers and in-house legal teams, digital sovereignty is no longer a theoretical question – it's a requirement from leadership, clients, and regulation. Where is your data located? Who has access to it? And what does it take when AI starts moving into the legal day-to-day?

Questions that call for a platform that answers them by design: hosted in the EU, governed by European law, with security and control built in from the ground up and built to make legal work simple to get done. But sovereignty is only half the story. The same platform brings together case management, time tracking, document handling, billing, and compliance in one place – giving your legal work a solid foundation, both today and as requirements for AI and security keep tightening.

Head of Product, Member & Legal, **Henrik Andersen**
EG

12.13

LEGAL AI IS ONLY AS STRONG AS YOUR SOURCES

AI can generate a legal answer in seconds. But for lawyers, what matters isn't just getting a fast answer – it's knowing what the answer is based on sources that can be verified.

In this session we show how Jurabibliotek combines AI with high-quality legal content. You can ask legal questions in natural language, work further with the answer, and go straight back to the sources to verify the legal basis.

We'll also show how Jurabibliotek's legislation can be integrated via API directly into the legal tech tools you already work in or for legal tools you are building.

Digital forretningsudvikler **Ann-Sophie Sletterhage**, Jurabibliotek Djøf Forlag

Udviklingschef **Jens-Christian Jensen**, Jurabibliotek Djøf Forlag

12.25 - 13.20 LUNCH BREAK

13.20 - 13.50

THE FUTURE OF DISPUTE RESOLUTION - DIGITALISATION, AI AND THE ROLE OF THE COURT

Digitalisation and artificial intelligence are beginning to change the way legal work is carried out and over time, they may also influence how disputes are handled and resolved.

In this session, Laila Lindemark, Head of Legal and Business at the Danish Court Administration, will share perspectives on what these developments may mean for the courts and for future dispute resolution. What opportunities do new technologies create? Where are the limitations? And how do we ensure that efficiency and innovation go hand in hand with trust, quality and legal certainty?

The session will offer a practical and thoughtful look at the role of technology in the justice system, drawing on both the Danish context and developments abroad.

Head of Legal and Business Affairs **Laila Lindemark**, Danish Courts Administration

13.50 - 14.30

Panel Session

BEYOND GOVERNANCE: MAKING YOUR DATA READY FOR AI

Head of Legal Operations and Innovation **Kasper Riis Hansen**, Arla Foods

Attorney-at-Law, Partner **Niels Chr. Ellegaard**, Plesner

CEO and Co-founder **Johan Häger**, Aloï AI

Legal Engineer **Rob Morrison**, Wordsmith

14.30 - 14.50: COFFEE BREAK, NETWORKING & PARTNER EXHIBITION

Take the opportunity to meet fellow participants and visit our partners in the exhibition area, where you can explore solutions, insights and new perspectives connected to today's programme.

14.50 - 15.20

TRANSFORMING GRC & COMPLIANCE THROUGH LEGAL TECH

Head of Digital and Data Protection **Natalija Bitiukova**, Carlsberg

15.20 - 15.50

Panel Session

HOW DO WE DESIGN AI SYSTEMS THAT LAWYERS AND BUSINESSES CAN TRUST?

Legal Transformation and Insights Specialist **Sarah Maringele**, Novonesis

Head of Field Product Innovation **Wilhelm Bolin**, Legora

AI Content Lead **Michael Herbing**, Karnov Group Denmark

15.50 - 16.05: NETWORKING BREAK

16.05 - 16.25

AI-AGENTS ARE NOT THE FUTURE - THEY ARE NOW

But how do we use them, and what are the risks? Christian, a former legal counsel turned AI-startup founder, walks you through concrete examples on how legal teams can automate 30-40% of their work with AI agents. Not next year. Not tomorrow. Today.

Founder & CEO **Christian Lambertsen**, ClearContract

16.25 - 16.55

AI 2026/2027: WHERE ARE WE – AND WHERE ARE WE HEADING?

In this short keynote, Brian will share his perspective on the current state of AI and where AI – and we – may be heading in 2026 and 2027.

Drawing on real-life examples, he will explore the latest developments in AI tools, how they are already changing the way we work, and what the future of professional life may look like in the coming years.

The talk will touch on ChatGPT, Claude, legal research, energy consumption, ethical dilemmas, regulation, and much more – with a particular focus on what these developments mean for lawyers, legal professionals, and the legal tech industry.

Cand. jur. **Brian Nygaard**, Brians Academy

16.55 - 17.05
